

**X Flipkart**

## MINDS IN MOTION: A PRODUCT CASE COMPETITION

## Reimagining Flipkart for Gen Z in Discovery driven world

TEAM  
**JusT Kase**

**S R Janani**

**Kamalish  
Muthukumar**

**Trinetra  
Dhara**

**Problem Statement:** Flipkart’s aim is to be THE commerce platform of choice for India’s next generation of shoppers, maximizing customer share of wallet. But Gen Z’s behavior - fragmented across platforms, influenced by social media, drawn to insurgent brands, and driven by trends rather than legacy - presents a fundamentally different challenge from serving millennials or Gen X.

WHAT IS E-COMMERCE ?

E-commerce is the buying and selling of goods and services through internet platforms, connecting buyers, sellers, payments, and logistics in a single digital ecosystem.

WHAT PURPOSE DID IT SERVE

- **Access Gap** → Limited physical retail reach (especially beyond metros)
- **Information Gap** → No easy way to compare prices, products, reviews
- **Convenience Gap** → Offline shopping = time, travel, limited options

CORE VALUE PROPOSTION

*“Unlimited choice + better prices + doorstep convenience”*

JOURNEY OF E-COMMERCE

CURRENT E-COMMERCE REALITY

|                                    |                                                                                                                                                                                                     |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>PLATFORM LANDSCAPE SHIFT</b>    | <b>Earlier:</b> Few dominant horizontal platforms<br><b>Now:</b><br>1. Rise of vertical + niche platforms<br>2. Social platforms influencing purchase journeys<br>Users operate across 5+ platforms |
| <b>SHIFT IN VALUE CREATION</b>     | <b>Earlier:</b> Catalog + price + logistics<br><b>Now:</b> Attention + trends + engagement + speed                                                                                                  |
| <b>DISCOVERY &amp; TRUST SHIFT</b> | Discovery → social-first (Instagram, YouTube)<br>Trust → creators & peers, not platforms<br><i>Commerce is no longer platform-centric, but attention-centric.</i>                                   |

WHY FLIPKART MUST ACT NOW?

- Strong in transactions & logistics
  - Weak in discovery, influence, engagement
- Risk:** Becoming just a checkout layer

**Opportunity:** Own the entire journey
- If Flipkart stays search-led → loses relevance early in journey*
- If Flipkart adapts → can own discovery + trust + conversion*

BEHAVIORAL DRIVERS

- Identity-driven shopping → expression over utility
- Creator & peer influence → validation-led decisions
- Trend responsiveness → driven by viral & micro-trends
- Fast consumption cycles → New, evolving collections
- Low brand loyalty → high experimentation & switching

**Gen Z prioritizes relevance, validation, and trends over brand and search efficiency**

WHERE DO GEN Z SPEND THEIR TIME?

~85–90% of Gen Z actively uses social media daily

45% Social Media

Discovery is passive and scroll-driven, not search-driven

25% Video content

Content consumption drives prolonged engagement, not transactions

15% Gaming

Interactive experiences increase engagement expectations

<5% E-Commerce

Transactions happen here, but attention does not

⚠️

**Attention is concentrated on social platforms, while transactions happen in e-commerce platforms**

KEY BEHAVIORAL SIGNALS

**5+ platforms used per year**  
→ fragmented journey

**70% discovery via social media**  
→ external discovery

**Trend-first market growing rapidly**  
→ fast cycles

**90%+ prefer UPI**  
→ seamless checkout expectation

**3x spend on new brands**  
→ low loyalty

**Gen Z commerce is fragmented, discovery-led, and trend-sensitive, unlike traditional search-driven shopping.**

GEN Z SEGMENTATION AND TARGETTING

| Segment           | Size   | Frequency | Avg Spend | Digital Influence | Priority |
|-------------------|--------|-----------|-----------|-------------------|----------|
| Trend Chasers     | High   | High      | Medium    | Very High         |          |
| Smart Shoppers    | Medium | Medium    | High      | Medium            |          |
| Creator Followers | High   | Medium    | Medium    | Very High         |          |
| Casual Buyers     | Medium | Low       | Low       | Low               |          |

**“High-impact Gen Z segments are defined more by influence and engagement than by spending alone.”**

USER PERSONA

Aarav Mehta  
21 y/o, College Student  
Delhi, India

**“Seen this on Instagram”  
“This is trending right now”**

- Spends heavily on fashion & gadgets, goes through many apps before buying
- Discovers products through reels & influencers
- Rarely searches directly on apps and buys impulsively during trends

**Key Barrier**  
Dependence on external validation

Sneha Iyer  
24 y/o, Working Professional  
Bangalore, India

**“Is this worth the price?”  
“Are the reviews genuine?”**

- Recently started earning
- Shops for lifestyle, beauty, essentials
- Balances price and quality
- Uses multiple platforms to compare
- Reads reviews before buying
- Waits for discounts or sales

**Key Barrier**  
Decision fatigue + Trust in product quality

Rohit Sharma  
19 y/o, Tier-2 College Student  
Indore, India

**“Saw this in a YouTube video”  
“Creator said this is good”**

- Active on YouTube & gaming platforms
- Follows tech creators & streamers & relies on them
- Prefers trending or “recommended” products
- Doesn’t explore deeply on apps

**Key Barrier**  
Dependence on external validation

USER JOURNEY MAPPING

**Aarav Mehta | 21 | College Student**  
SCENARIO: Opens Instagram to scroll, discovers a cosmetic product she wasn’t planning to buy.

| Stage                      | Discovery                                                | Influence                                                    | Exploration                                       | Validation                                    | Comparison                                         | Purchase                         | Post-Purchase                        |
|----------------------------|----------------------------------------------------------|--------------------------------------------------------------|---------------------------------------------------|-----------------------------------------------|----------------------------------------------------|----------------------------------|--------------------------------------|
| Platform                   | Instagram                                                | Influencer                                                   | Youtube/Google                                    | Reddit/Comments                               | Multiple apps                                      | Flipkart                         | Instagram story                      |
| Action Thoughts & Emotions | Sees product in reels repeatedly<br>“This looks good...” | Watches creator using product<br>“If they use it, it’s good” | Searches reviews, shades<br>“Which one suits me?” | Reads opinions & reviews<br>“Is it worth it?” | Checks price/offers<br>“Where is it cheaper?”<br>😬 | Buys due to offer<br>“Good deal” | Shares/reviews<br>“Let me post this” |
| Pain Point                 | No intent, passive discovery                             | Trust outside platform                                       | Too much scattered info                           | Conflicting reviews                           | Platform switching                                 | Flipkart enters late             | Value leakage                        |
| Opportunity                | Bring discovery into Flipkart                            | Creator integration                                          | Curated content                                   | Community validation                          | Unified experience                                 | Capture earlier stages           | In-app sharing                       |

**“Flipkart captures only the transaction, while discovery, influence, and validation happen elsewhere.”**

RESEARCH INSIGHTS

1. Search → Scroll → Serendipity

- Users won't look for products
- Products will find users via feeds, reels, AI recommendations

Discovery becomes passive, continuous, entertainment-driven

2. Platform Trust → Distributed Trust

Ratings → Creators + peers + communities

- "Who is recommending?" matters more than "what rating?"

Trust becomes social, contextual, and real-time

3.Products → Identity & Expression

Buying is no longer utility-first  
It becomes:

- "Does this match my vibe?"
- "Is this trending / aesthetic / me?"

Commerce becomes self-expression

4. Planned Buying → Continuous Micro-Consumption

- No fixed "shopping intent" moments
- Users buy during **scrolling, boredom, trend spikes etc**

Shopping becomes always-on behavior

5. Choice Overload → Curated Decisioning

- Too many options = fatigue
- Users will prefer: "Top picks", "Creator bundles", "People like you bought this"

Shift from choice → curation

COMPETITIVE MAPPING

*"No single platform owns the full Gen Z journey"*

| Stage          | Player                                                                              | What they do well                         |
|----------------|-------------------------------------------------------------------------------------|-------------------------------------------|
| Discovery      |  | Scroll-based, creator-led discovery       |
| Trend commerce |  | Fast fashion, trend drops, inspiration    |
| Value          |  | Affordable, social-driven discovery       |
| Trust          |  | Reviews, reliability, decision confidence |
| Transaction    |  | Logistics, pricing, conversion            |

WHAT WORKS FOR GENZ?

- **Content > Catalog**  
→ Discovery happens via reels, not search
  - **Creators > Brands**  
→ Trust is built via influencers & communities
  - **Relatability > Perfection**  
→ Meme, raw, UGC content performs better
  - **Speed > Stability**  
→ Fast trend cycles, frequent drops
  - **Personalization matters**  
→ Users expect feeds tailored to them
- Signals (from insta and yt research)
- 83% purchased via Reels/Stories
  - 71% prefer YouTube Shorts for discovery
  - 62% say influencer trust is crucial
- "Brands are winning by becoming content platforms, not just product platforms."**

STRATEGIES OF COMPANIES CATERING TO GENZ

- Creator-led **honest reviews**
- Focus on **radical transparency**
- Snackable, relatable content

Impact: **4x sales growth**  
Insight: *Authenticity > Advertising*

- UGC + influencer mix (Reels, Shorts)
- Targets **niche communities** (parents, eco-conscious)
- Uses micro-creators at scale

Insight: Trust is built through relatable creators

- Tier 2 + influencer-heavy launches
- Fast, **trend-driven product drops**
- Bold, unfiltered content

Insight: Speed + relatability drive engagement

- Heavy influencer + tutorial-led content (Reels, YouTube)
- Uses data to push trending products & personalize feeds

Insight: Content + personalization = higher engagement & trust

RECOMMENDATIONS FOR FLIPKART

OWN DISCOVERY

- Move from search → scroll
- Bring content inside platform

OWN TRUST

- Integrate creators + community
- Reduce reliance on external validation

OWN THE JOURNEY

- Reduce platform switching
- Capture users before purchase

VISION

Make Flipkart the default platform where Gen Z not just transacts but discovers, validates and purchases

CORE IDEA

Gen Z shopping behaviour is a loop but Flipkart owns only the last step  

Discover >> Influence >> Validate >> Buy

We bring this entire loop inside Flipkart using a 3-lever system

TRADE OFFS

- Avoid building full social platform
- Keep community contextual
- Creator-led demand generation

LEVER 1

CREATOR-LED COMMERCE LAYER

Move influence from Social media → Flipkart

- Insight: Gen Z trusts creators over platforms
- Shift: Bring creators inside Flipkart

LEVER 2

AI DISCOVERY & TREND ENGINE

Shift from search → scroll-based discovery

- Insight: Gen Z scrolls, not searches
- Shift: Flipkart becomes scroll-first

LEVER 3

CONTEXTUAL TRUST & COMMUNITY LAYER

Move validation from outside → inside Flipkart

- Insight: Validation happens outside
- Shift: Bring trust into platform

BUSSINESS IMPACT

LEVER 1 Engagement ↑

LEVER 2 Coverson ↑

LEVER 3 Drop offs ↓

= Wallet share ↑

HOW THESE LEVERS WORK TOGETHER?

DISCOVERY (AI ENGINE)

- Personalized Feed
- Trend Signals

INFLUENCE (CREATOR LAYER)

- Shoppable Content
- Creator Picks

VALIDATION (COMMUNITY LAYER)

- Ask Before You Buy
- Live Discussions

PURCHASE (FLIPKART CORE)

- Seamless Checkout
- UPI-first

REINFORCEMENT

- "Rewards & Gamification"
- "Post-purchase content"

Data + Content Feedback Loop

We move discovery, influence and validation inside Flipkart to capture the full Gen Z journey

WHY FLIPKART WINS HERE?

- Logistics advantage
- User base
- Trust infra

>

fast trend delivery

creator ecosystem scale

higher conversion

WHAT CHANGES FOR THE USER?

| TODAY                        | WITH OUR SYSTEM            |
|------------------------------|----------------------------|
| Discover on Social media     | Discover on Flipkart       |
| Validate on YouTube/WhatsApp | Validate inside Flipkart   |
| Buy on Flipkart              | Entire journey on Flipkart |

The question now is:

How does this system translate into a seamless user experience?

2.8x GEN Z LTV VS TODAY

We are sequencing our GTM based on how Gen Z actually shops - starting with creator-led discovery and trust, then building habit through personalisation, and finally enabling social-driven growth. This prioritisation ensures we focus first on what drives purchase, then retention, and only introduce scale features once the ecosystem is ready.

| Priority Level | Meaning                                                           | Priority   | Feature                | Why This Priority?                                                   |
|----------------|-------------------------------------------------------------------|------------|------------------------|----------------------------------------------------------------------|
| Priority 1     | Core features that directly enable discovery, trust, and purchase | Priority 1 | Creator Onboarding     | Foundation of content and trust -system cannot work without creators |
| Priority 2     | Features that improve retention and increase spending             | Priority 1 | Creator Storefronts    | Converts creator influence into structured shopping                  |
| Priority 3     | Supporting features that enhance confidence and experience        | Priority 1 | Shoppable Content      | Directly drives conversion from content                              |
| Priority 4     | Scale features that require a large user base                     | Priority 1 | Basic Discovery Feed   | Enables browsing instead of search                                   |
|                |                                                                   | Priority 1 | Creator-Led Validation | Critical for trust → purchase decision                               |

SUCCESS METRICS

LEVER 1 - CREATOR-LED COMMERCE LAYER

North star: Creator-Driven GMV Share

What % of total GMV is influenced or directly generated through creator storefronts and shoppable content. The single strongest proof the creator layer is working.

[GMV from Creator] - [Assisted Purchases]

Number of successful sessions

Metric #2: Shoppable Content Click-Through Rate

Frequency at which users tap on tagged products within creator videos or posts, indicating how effectively creators are driving product interest.

Clicks on Tagged Products within Creator Content

Total Impressions of Creator Content

Metric #3: Creator Supply Flywheel Index

Tracks whether the creator ecosystem is self-sustaining. A ratio above 1 confirms the flywheel is spinning - more creators joining and producing than churning out.

New Active Creators Onboarded (30d) × Avg. Content Pieces per Creator

Churned Creators (30d) × Their Prior Avg. Content Output

LEVER 3 -CONTEXTUAL TRUST & COMMUNITY LAYER

North star: Community-Assisted Conversion Lift

Compares purchase conversion of users who engaged with community signals vs. those who didn't. Isolates the trust layer's true impact on the buy decision.

Conversion Rate of Users Who Engaged with Community Features

Conversion Rate of Users Who Did Not Engage with Community Features

Metric #2: "Ask Before You Buy" Response Rate

The % of user questions on product pages that receive at least one answer from buyers, creators, or the community within 24 hours — a proxy for community health and utility.

Questions Answered within 24 Hours

Total Questions Posted via "Ask Before You Buy"

LEVER 2 - AI DISCOVERY & TREND ENGINE

North star: Discovery Feed Engagement Rate

Depth of interactions with the AI scroll feed (taps, saves, add-to-cart from feed, creator video watch time) - signals whether the platform is building a daily browsing habit.

Total Meaningful Interactions with Feed (taps + saves + add-to-carts)

Total Number of Feed Sessions

Metric #2: Browse-to-Purchase Conversion Rate

Users completing a purchase after entering via discovery (feed or trend engine) rather than direct search. Reflects the AI engine's direct revenue impact.

Purchases Originating from Feed / Trend Entry Points

Total Discovery Sessions Initiated

Metric #3: Average Daily Session Time (Gen Z)

Tracks whether the infinite scroll feed is building the daily open-app habit. Target: grow average session from ~8 min to 18+ min within 6 months of launch.

Total Time Spent in App by Gen Z Users (daily)

Total Active Gen Z Users (that day)

OVERALL - BUSINESS IMPACT METRICS

Metric #1: Gen Z Wallet Share Growth

The share of a Gen Z user's total online shopping spend that goes to Flipkart - the ultimate measure of whether all 3 levers together are winning the journey end-to-end.

Flipkart Spend by Gen Z Users (Monthly)

Estimated Total Online Shopping Spend by Same Users (Survey-Based)

Metric #2: D30 Gen Z Retention Rate

Share of new Gen Z users who return and make at least one interaction within 30 days of first install. The clearest proof that Flipkart has become a habit, not a one-time destination.

Gen Z Users Active on Day 30 after Install

Total Gen Z Users Acquired in the Same Cohort

KEY TRADE - OFFS

Social Platform vs. E-commerce Identity

Adding creator/community features risks confusing the core "buy things" mental model.

**Mitigation:** keep discovery feed opt-in at launch, not the default home screen.

Creator Quality vs. Creator Scale

Open onboarding grows supply fast but floods the platform with low-quality content, hurting trust.

**Mitigation:** tiered verification (nano → verified), creator quality score gates visibility.

Platform complexity vs. engineering bandwidth

Three new systems simultaneously is high execution risk.

**Mitigation:** strict phased rollout - creator storefronts (Phase 1) must show conversion lift before Phase 2 AI investment unlocks.

Community adoption vs. moderation cost

UGC at scale requires heavy moderation (misinformation, fake reviews, spam).

**Mitigation:** AI-first moderation, embed community only at product level (not open forums), phased rollout in select categories first.

**THANK YOU**
