REIMAGINING MUTUAL FUND ASSET
MANAGEMENT IN INDIA

Submitted by:
Trineta Dhara
Kamalish
S R Janani

WHAT IS AMC?

Pools investor money to create & manage mutual funds/ETFs invests across assets as per a disclosed mandate while ensuring compliance and risk management.

REVENUE = AUM × TER

STAKEHOLDERS INVOLVED

1. Investors Provides the seeking Capital	2. AMCs Design schemes, run portfolios; Earn from AUM	3. Distributors (Banks, IFAs etc) Primary acquisition & advisory channel	4. Custodian Ensure AMCs follow fund’s mandate & investor-protection rules	5. Regulatory bodies (SEBI, AMFI) Sets rules for the schemes designed and operated

MONARCH NETWORK CAPITAL

- Strong HNI-Led User Base with Proven Capital Raising Ability
- Scalable Distribution Base: 100+ Cities, 55+ Branches, 900+ Sub-Brokers
- High Operating Leverage Revenue Model: Asset-Light, Fee-Based Growth
- Concentrated, High-Conviction Portfolio Strategy
- High Operating Leverage Revenue Model: Asset-Light, Fee-Based Growth

WHY SHOULD MONARCH FOCUS ON AMCs?

\$600+ billion
 India’s mutual-fund industry AUM

5X in last 10 yrs

AUM is growing at 5X rate

~ 7 % population
 Out of 1.4 B Indians, only 9 crores invest

₹18,000+ cr p.m

SIP inflows consistently ~₹20,000–30,000+ crore per month.

- Capital Backing Secured - ₹59 Cr Infusion Approved
- AMC revenue scales with AUM (1% fee on ₹10,000 Cr = ₹100 Cr annual revenue).

COMPETITOR ANALYSIS

Factor	SBI Mutual Fund	ICICI Prudential AMC	Monarch Network Capital	Angel One AMC
Scale & AUM Strength	Largest AMC with massive AUM and strong market dominance.	Top-tier AMC with large AUM and strong institutional backing.	Boutique-to-mid scale with focused AIF/PMS assets.	Small but growing AMC driven by digital retail flows.
Target Segment & Product Focus	Targets mass retail through diversified mutual funds.	Serves retail and institutions with strong equity offerings.	Targets HNIs via concentrated PMS and AIF strategies.	Targets digital retail investors via app-based mutual funds.
Distribution & USP	Leverages SBI bank network; strongest edge is trust and reach.	Uses ICICI Bank network; edge lies in research and brand strength.	Relationship-driven distribution; edge is high-conviction investing.	App-led distribution; edge is seamless digital integration.

DRAWBACKS IN CURRENT SYSTEM

1

Asset Gathering Is Incentivised More Than Investor Outcomes

2

Product Proliferation Without Real Differentiation

3

Aggressive performance marketing by AMCs

4

Poor Investor Understanding of “Why Am I Invested?”

5

Opaque and Misunderstood Fee Structures

PROBLEM IDENTIFICATION - WHO WE SERVE & WHAT WE CHOOSE TO SOLVE

BEGINNERS

- Invest small amounts
- Influenced by social media
- Chasing return
- Fearful during volatility

EMERGING

- SIP heavy
- Own multiple funds
- No structured portfolio
- Diversify randomly

ADVANCED

- Frequent switching
- Thematic investing
- Sector bets
- High volatility tolerance

ADVISOR DRIVEN

- Rely on advisors
- Performance focused
- Low DIY involvement
- No clarity on funds

INVESTOR SEGMENTATION (BEHAVIOURAL × PORTFOLIO MATURITY)

Customer Segment	Asset Size	Portfolio Behaviour	Guidance Need	Retention Potential	Fit with GPA	Priority Score
First-Time Explorers	<₹5L	1-2 funds (basic SIP)	Medium	Low	Medium	2.8
Emerging Builders	₹5L-₹50L	4-8 (overlapping funds)	Very High	High	Very High	4.6
Tactical Traders	₹10L-₹40L	Frequent switching	Low	Low	Low	2.5
HNI Delegators	₹50L+	Advisor managed	Low	High	Low	3.0

WHY?

- Backed by Monarch’s wealth expertise
- Strong AUM density
- High portfolio construction gap
- Long term relationship potential
- Behaviourally stable (SIP heavy)

Priority Score = (Rn + G + A + Rt + S) / 5

- Rn - AUM per customer
- Guidance Need - Portfolio structure gap
- Adoption - Willingness to use guided model
- Retention - Stability & long term horizon
- Strategic Fit with Monarch

₹16 trillion

USER PERSONA

Confused by overchoice

Vijayabaskar, 27, IT software

Annual income: ₹20L
Investable assets: ₹7-10L
Investment mode: SIP, App based investing

“I’ve invested in 6-7 mutual funds, but I honestly don’t know if my portfolio actually makes sense.”

Goals

- Build long-term wealth
- Feel confident about investing decisions
- Beat inflation without extreme risk

Needs

- “I want to know why each fund is there.”
- “I don’t want overlapping funds.”
- “I want real diversification, not guesswork.”

Less time but serious

Shivani, 35, Startup owner

Annual income: ₹29L
Investable assets: ₹12-16L
Investment mode: SIP, Lump investment

“I earn well but I don’t have the time or clarity to actively manage and rebalance my investments.”

Goals

- Fund children’s education
- Build a retirement corpus
- Reduce stress related to investing

Needs

- “I want guidance without constant monitoring.”
- “I want my portfolio to adjust intelligently.”

PAIN POINTS

1

Portfolio structure confusion

- Hidden stock overlap
- Imbalanced sector/style exposure
- No defined investing framework

2

Weak investment decision

- Return chasing
- Poor rebalancing discipline
- Trend-driven allocations

3

Lack of Portfolio Visibility

- No clear risk overview
- Cannot measure diversification
- No clarity on fund roles

4

Advisory Accessibility Gap

- Advisors too expensive
- DIY platforms lack guidance
- Product-pushing distributors

5

Industry Design Flaws

- Too many similar funds
- Product-first selling
- Return-focused comparisons

6

Long-Term Confidence Gap

- Unsure if portfolio fits goals
- Fear of wrong allocation
- Low conviction in downturns

WHICH GAPS SHOULD WE FOCUS ON?

Gap Category	Investor Impact (I)	Solvability (S)	Trust Impact (T)	Differentiation (D)	Priority Score
Portfolio structure confusion	5	5	4	4	4.5
Lack of Portfolio Visibility	4	5	4	4	4.25
Industry Design Flaws	4	4	4	5	4.25
Weak investment decision	4	3	3	3	3.25
Long-Term Confidence Gap	3	3	3	3	3.0
Advisory Accessibility Gap	3	2	3	2	2.5

We will solve the core structural gap: The absence of a portfolio construction framework by shifting from product-led investing to guided, portfolio-first design.

OUR SOLUTION

GOAL

To reduce risky stock overlap & prevent panic-selling by making professional-grade diversification simple and automatic.

TARGET

Young professionals who earn well but don't have a clear plan or access to expert financial advisors.

MISSION

To help new investors stop buying random mutual funds & build structured portfolios.

USER JOURNEY The platform uses a "Funnel Approach" where users select 2 funds per filter to build a balanced, 6-fund portfolio.

STEP 1: MARKET CAPITALIZATION (STABILITY VS. GROWTH)

The user selects the size of the companies they want to own.

- Options: Large Cap (Bluechip), Nifty Next 50, Mid Cap, Small Cap.
- User Action: Pick 2 funds.
- Purpose: Ensures the portfolio has a solid foundation (Large Cap) while capturing high-growth potential (Mid/Small Cap).

STEP 2: ECONOMIC SECTOR (INDUSTRY DIVERSIFICATION)

The user chooses which "engines" of the economy will drive their returns.

- Options: Financials, Technology, Manufacturing, Consumption, Healthcare.
- User Action: Pick 2 funds.
- Purpose: Prevents "Concentration Risk" ensuring the portfolio doesn't crash if one specific industry (like Tech) underperforms.

STEP 3: INVESTMENT STYLE (MARKET STRATEGY)

The user decides how stocks are picked within their funds.

- Options: Growth, Value, Quality, Momentum, Low Volatility.
- User Action: Pick 2 funds.
- Purpose: Makes the portfolio "All-Weather." For example, Value funds protect you when Growth funds are too expensive.

THE SYSTEM INTELLIGENCE (BACKEND LOGIC)

- Overlap Detection: If a user picks two funds with 70% of the same stocks, the system triggers a "Red Alert" and suggests a diversifying alternative.
- Smart Nudges: If a user picks only high-risk Small Cap funds, the system automatically highlights Large Cap or Low Volatility options to restore balance.
- Final Output: A mathematically optimized 6-fund portfolio that covers size, sector, and strategy.

SOLUTION ARCHITECTURE: The Guided Portfolio Architecture (GPA) is a modular selection engine that replaces random fund picking with a structured, 3-axis logic.

MARKET ENTRY STRATEGY

RETENTION LOOP

PHASE-WISE TIMELINE

We validate in year 1, scale systematically in years 2–3, and build a national retention-driven portfolio ecosystem in years 4–5.

MARKETING PLAN

Target Segment

Emerging affluent, digital-first investors

Blended TER

0.90%

AUM GROWTH PLAN

Year	Investors	Avg AUM per	Total AUM
Year 1 [product-market]	5,000	₹5L	₹250 Cr
Year 2 [Distribution momentum]	18,000	₹5.5L	₹990 Cr
Year 3 [Brand scale]	40,000	₹6L	₹2,400 Cr

REVENUE PROJECTION

Revenue = AUM × 0.9%

Year	AUM	Revenue
Year 1	₹250 Cr	₹2.25 Cr
Year 2	₹990 Cr	₹8.91 Cr
Year 3	₹2,400 Cr	₹21.6 Cr

COST STRUCTURE

Fixed Costs		Variable Costs			
Component	Cost	Year	New Investors	CAC Spend	Total Costs
Fund Mgmt Team	₹4 Cr	Year 1	5,000	₹1.5 Cr	
Compliance & Ops	₹1.5 Cr	Year 2	13,000	₹3.9 Cr

		Year 2	₹10 Cr	₹3.9 Cr	₹13.9 Cr
		Year 3	₹10 Cr	₹6.6 Cr	₹16.6 Cr
Total Fixed	₹10 Cr				

THE NORTH STAR METRIC

PORTFOLIO ARCHITECTURE COMPLETION (PAC) RATE

- What it is: The % of users who finish all 3 steps and successfully build a balanced 6-fund portfolio.
- Why it matters: It proves that the software is actually turning "random buyers" into "intentional builders."

SUPPORTING METRICS

- Portfolio Health (The "Correctness" Metric)
 - Overlap Reduction: How much the software successfully cuts down on duplicate stocks in a user’s portfolio.
 - 3-Axis Coverage: The percentage of users who have at least one fund in each of the three categories (Size, Sector, and Style).
- Investor Behavior (The "Trust" Metric)
 - SIP Staying Power: How many users keep their monthly investments running during a market drop compared to regular investors.
 - Nudge Success Rate: How often a user follows a system suggestion to pick a "balancing" fund (like a Large Cap) to reduce their risk.
- Platform Speed (The "Ease of Use" Metric)
 - Time-to-Build: How quickly a confused beginner can go from having no plan to owning a fully diversified 6-fund portfolio.
 - User Confidence Score: A quick rating given by the user after the journey to see if they feel more "in control" than they did before.

RISK - IMPACT - MITIGATION PLAN

Risk	Impact	Mitigation
Low investor adoption of GPA	Slower AUM growth	Start with Monarch’s existing clients; offer free portfolio health check to drive trial
Market downturn in early phase	Redemptions; loss of confidence	Clear long-term communication; behavioural nudges; structured rebalancing support
Distributor resistance	Weak channel push	Incentivise GPA-linked AUM; train distributors on portfolio-first pitch
High customer acquisition cost	Margin pressure	Focus on referrals; upgrade existing base; optimise digital funnel
Competitors replicate concept	Reduced differentiation	Build strong brand around “Portfolio-First AMC”; integrate GPA deeply into platform

THANK YOU
